Delivering Meals One Smile At A Time!

New Black Trays Debut

By now you will have noticed the new look in our meal trays. The black tray shows off the foods items much better – especially for people with poor eyesight. You will also notice they keep the food much hotter. That is why we have provided you with potholders to protect your hands. As with all new products, though, we would ask that you notify us immediately if you or the consumers experience any problems with the trays.

Summer Menu Changes

Last year, the response to our occasional cold meal was very positive. We are very excited to tell you that this year, beginning in May, we will be serving cold meals every Friday! Heated carriers will not be used at all on Fridays; you'll be working with all "picnic coolers." We hope that you can support the variety this will bring to the consumers and make this weekly adjustment to your routine.
